Realty Development Associates celebrates 20th anniversary; recognized by State Senate, House of Representatives, Town of Bourne

SAGAMORE, MA, ISSUED MAY 7, 2010...Realty Development Associates (www.rdamodularhomes.com), a firm that specializes in the construction of modular homes throughout Southeastern Massachusetts and Cape Cod, celebrated its twentieth anniversary of business this week with a ceremony at their Sagamore offices/model home location. Company president and founder Don Shulman, a Marstons Mills resident, was recognized for the success of the business by the Massachusetts House of Representatives, the Massachusetts Senate, The Town of Bourne's Selectmen's Office, and the Cape Cod Canal Region Chamber of Commerce.

Ben Nugent, from State Representative Jeffrey Perry's office, presented President Don Shulman with a citation from the Massachusetts House of Representatives commending the company on twenty years of success as a business; the company also received a letter and a citation from Massachusetts Senate President Therese Murray who commended the company and its team for their many contributions to the region. Don Shulman and his team also received kind words from Bourne Selectman Stephen Mealy and Cape Cod Canal Region Chamber of Commerce representative Teri Stanley, who congratulated the company on its success.

Realty Development Associates has seen steady growth in its two decades; in 2009, the firm opened a second model home/office in Norton to complement its headquarters in Sagamore. RDA also recently announced that it will be developing a 25-lot modular subdivision, The Trails of Plymouth, off Route 3. The 20-person firm hosts ongoing open houses and seminars on modular construction, and has earned regional and national recognition for its commitment to quality and environmentally-friendly building. Specialties within the RDA menu include teardown-rebuilds as well as in-law apartments, and a wide range of traditional home styles. Last summer, Realty Development Associates was chosen for an unusual assignment – the design and building of a modular church.

Realty Development Associates works exclusively with its factory partner, Westchester Modular Homes, the Wingdale, NY plant that physically constructs the parts to the buildings and then ships them to the site." Art Feith of Westchester Modular Homes was on hand at the ceremony to congratulate the company on its anniversary.

Don Shulman, President of Realty Development Associates, said, "This has been a great twenty years for us. Modular construction, which is what we focus on exclusively, offers so many advantages over traditional, stick-built work, and we continue to see growth even in these difficult economic times. I am fortunate to have a great team of people here at Realty Development Associates, and we appreciate the support and good wishes of the legislature, the Chamber, and the Town of Bourne. We look forward to many more years serving the needs of the people of this region."

About Realty Development Associates

RDA, Inc. (Realty Development Associates) is a leading full-service, one-stop builder specializing in modular or factory-constructed homes. The company, founded in 1989, specializes in residential

communities and quality homes throughout Southeastern Massachusetts. Realty Development Associates' main service area includes Barnstable, Bristol and Plymouth Counties. Realty Development Associates offers all services related to building, including engineering studies, permitting, real estate, financing, and construction services. The company has developed a niche market in the "teardown and rebuild" process for individuals who like the town and the lot that is their residence but have outgrown their home. Realty Development Associates, with its factory partner Westchester Modular Homes of Wingdale, NY, offers factory-built housing in all styles including Capes and Colonials. The inclusion of "in-law" additions is a new and popular option. Factory-constructed housing offers a series of built-in advantages, including no time lost due to weather constraints, no damage to wood that is exposed to the elements during construction, and superior quality. A factory-built house can be assembled on site and made weather tight in a day or two, and saves the homeowner considerable time. Realty Development offers a unique, customized program where a prospective purchaser can work with a CAD (computer aided design) system and create a totally customized home to meet one's personal needs and tastes. Realty Development Associates maintains headquarters in Sagamore, MA, and has recently opened a second model in Norton, MA, which offers a close and complete look at "in progress" modular construction. To learn more about Realty Development Associates please visit www.RDAmodularhomes.com or call (508) 888-4212.

Realty Development Associates received citations from the Massachusetts House of Representatives and the Massachusetts Senate on the occasion of its 20th anniversary. The company held a reception at its offices at 1 Bluff Road, Sagamore, on May 6.
